

# Rohan Tembhurne

Maharashtra, India | [github.com/rohantembhurne](https://github.com/rohantembhurne)

## SUMMARY

---

Motivated entry-level Web Developer with hands-on experience building modern, responsive and user-friendly web projects. Skilled in HTML5, CSS3, JavaScript, Tailwind CSS, Git, GitHub, Vite and basic React. Experienced in developing e-commerce interfaces, SaaS landing pages and responsive website experiences with a focus on clean UI, usability and mobile-friendly design. Seeking an opportunity to contribute to real-world web development projects while continuing to grow as a frontend developer.

## EDUCATION

---

### Kisan Rao Khobragade College, Vairagad

*Bachelor of Arts (B.A.), 2nd Year — Pursuing, Gondwana University, Gadchiroli*

## EXPERIENCE

---

### RNT Mart — Modern E-Commerce Website

React · Vite · Tailwind CSS · JavaScript

- Developed a modern, responsive e-commerce website as a hands-on frontend development project.
- Built product listing and product detail interfaces with a clean, user-focused layout.
- Implemented search and category filtering to improve product discovery.
- Developed shopping cart and checkout interfaces for a complete e-commerce experience.
- Created mobile-friendly layouts optimized for different screen sizes.
- Applied an SEO-friendly structure and reusable frontend patterns.
- Live Project: [rnt-cart-styledisplay-name-rnt-mart-shopping.lovable.app](https://rnt-cart-styledisplay-name-rnt-mart-shopping.lovable.app)

### FlowAI — AI SaaS Landing Page

React · Vite · Tailwind CSS · JavaScript

- Built a modern SaaS landing page focused on professional UI and responsive user experience.
- Developed a structured hero section, CTA sections and supporting landing page content.
- Created a professional dashboard-style interface to represent an AI SaaS product.
- Implemented clean, modern layouts for both desktop and mobile experiences.
- Used React, Vite and Tailwind CSS to develop the frontend interface.

### Independent Web Development Projects

Freelance / Independent Web Development

- Develop responsive business websites, landing pages, portfolio websites and custom web interfaces.
- Build clean, modern layouts using HTML, CSS, JavaScript and Tailwind CSS.
- Create mobile-friendly experiences that adapt across desktop, tablet and mobile devices.
- Manage source code and project versions using Git and GitHub.
- Work with Vite-based frontend projects and website deployment workflows.

## PROJECTS

---

### RNT Mart — Modern E-Commerce Website | React · Vite · Tailwind CSS · JavaScript

- Developed a modern, responsive e-commerce website as a hands-on frontend development project.
- Built product listing and product detail interfaces with a clean, user-focused layout.
- Implemented search and category filtering to improve product discovery.
- Developed shopping cart and checkout interfaces for a complete e-commerce experience.
- Created mobile-friendly layouts optimized for different screen sizes.

- Applied an SEO-friendly structure and reusable frontend patterns.
